About Korax

Korax Energy is a trusted provider of inspection, expediting, audit, technical staffing, engineering support, project management, procurement, and business solutions for the energy, industrial, and infrastructure sectors.

We work alongside our clients to deliver reliable, efficient, and cost-effective solutions that improve project performance, streamline operations, and support long-term business growth. By combining technical expertise, industry knowledge, and a highly skilled workforce, we help organizations execute projects successfully while upholding the highest standards of quality, safety, and compliance.

At Korax Energy, we believe our people are our greatest strength. Guided by a commitment to excellence, integrity, and innovation, our team collaborates closely with clients to understand their unique requirements and provide tailored, value-driven solutions. From initial planning and procurement to project execution and ongoing support, we remain focused on delivering measurable results and exceeding expectations.

Our customer-centric approach, collaborative culture, and dedication to continuous improvement enable us to build lasting partnerships founded on trust, reliability, and consistent performance. As industries continue to evolve, Korax Energy remains committed to helping clients overcome challenges, embrace new opportunities, and achieve sustainable success through innovative and dependable solutions.

Vision & Mission

Our Vision

To become a globally trusted partner in engineering, technical, and business solutions, empowering the energy, industrial, and infrastructure sectors through innovation, operational excellence, and sustainable practices that drive long-term success.

Our Mission

To deliver world-class engineering, technical, and business solutions that promote quality, compliance, safety, and operational excellence through integrity, precision, and technical expertise.

Core Values

Integrity – We conduct our business with honesty, transparency, and the highest ethical standards.

Precision – We deliver every solution with accuracy, attention to detail, and technical excellence.

Safety – We prioritize the health, safety, and well-being of our people, clients, and communities.

Quality – We are committed to delivering services that consistently meet the highest standards.

Reliability – We build trust through dependable performance and consistent results.

Sustainability – We support responsible business practices that create long-term value for our clients and the environment.

Innovation – We embrace new ideas and technologies to deliver smarter, more effective solutions.

Client Commitment – We put our clients at the centre of everything we do, building lasting partnerships through exceptional service and value.

Our Services

Third-Party & Second-Party Inspection

Independent inspection services to verify compliance with project specifications, international standards, and regulatory requirements, ensuring quality, safety, and reliability throughout the project lifecycle.

Expedition Services

Proactive monitoring and coordination of procurement, manufacturing, and delivery activities to ensure materials and equipment are supplied on schedule and project milestones are achieved.

Quality Assurance & Quality Control (QA/QC)

Comprehensive quality management solutions that monitor, evaluate, and improve processes, products, and services to ensure consistent compliance with industry standards and client expectations.

Vendor Assessment

Comprehensive evaluation of suppliers to assess their technical capabilities, quality management systems, manufacturing processes, and overall ability to meet project requirements.

Hazardous Area Inspections

Specialized inspections of electrical, instrumentation, and mechanical equipment in hazardous locations, ensuring compliance with IEC, ATEX, DSEAR, NEC, and other applicable international standards.

Technical Staffing Services

Provision of highly qualified engineering, technical, inspection, and project personnel to support client operations, shutdowns, maintenance, and capital projects.

Certification & Training

Industry-focused certification and professional training programs designed to enhance workforce competency, technical skills, regulatory compliance, and operational excellence.

Audit Services

Comprehensive auditing services that assess management systems, operational processes, and regulatory compliance, helping organizations improve efficiency, reduce risk, and maintain industry standards.

Project Management Services

End-to-end project planning, coordination, and execution to optimize resources, control costs, manage risks, and ensure successful project delivery.

Calibration Services

Facilitating precision calibration services through ISO/IEC 17025 accredited laboratories, ensuring accurate measurements, traceability, and compliance with international quality standards.

NDT & Mechanical Testing

Advanced non-destructive testing and mechanical testing services to evaluate material integrity, detect defects, and verify asset reliability without compromising structural performance.

Building Inspection

Comprehensive inspections of commercial, industrial, and residential buildings to assess structural integrity, safety, quality, and compliance with applicable codes and standards.

Home Inspection

Detailed pre-purchase, pre-sale, and maintenance inspections that evaluate the condition, safety, and functionality of residential properties, helping homeowners and buyers make informed decisions.

Industries

Oil & Gas

Delivering inspection, expediting, audit, and technical support services across upstream, midstream, and downstream operations. We help ensure quality, safety, regulatory compliance, and reliable project execution throughout the project lifecycle.

Energy & Power

Supporting conventional and renewable power projects with inspection, engineering, technical staffing, and quality assurance solutions. Our services enhance operational efficiency, asset reliability, and project performance from procurement through commissioning.

Infrastructure & Construction

Providing independent inspection, quality control, and project support services for infrastructure and construction projects, including water desalination plants, commercial and industrial buildings, roads, bridges, utilities, and street lighting systems. We help clients achieve regulatory compliance, reduce project risks, and deliver successful projects on time and within quality standards.

Renewable Energy

Enabling sustainable energy projects through inspection, technical staffing, engineering support, and quality assurance services. We support the successful development and execution of solar, wind, and other renewable energy projects while ensuring compliance with international standards.

Petrochemical

Delivering specialized inspection, expediting, and technical services for petrochemical plants and process facilities. Our solutions help maintain asset integrity, operational reliability, process safety, and compliance with industry standards.

Marine

Providing inspection, vendor surveillance, expediting, and quality assurance services for the marine and offshore industry. We support shipbuilding, vessel and barge inspections, port infrastructure, offshore facilities, and marine equipment with dependable technical expertise.

Mining & Metals

Supporting mining, mineral processing, and metals industries with inspection, engineering support, technical staffing, and quality assurance services. Our solutions improve equipment reliability, operational efficiency, and compliance across critical operations.

Government & Semi-Government

Partnering with government and semi-government organizations to deliver reliable inspection, audit, and compliance services for public infrastructure and strategic development projects. We support utilities, transportation, energy, and civil infrastructure initiatives with transparency, technical excellence, and dependable project oversight.

Manufacturing & Process Industries

Offering inspection, audit, technical staffing, engineering support, and vendor surveillance services for manufacturing and process industries. We help organizations enhance product quality, optimize operations, ensure regulatory compliance, and maintain the highest standards of safety and performance.

Why Korax Energy?

At Korax Energy, we are committed to delivering value through quality, reliability, and customer-focused solutions. Our collaborative approach, technical expertise, and commitment to continuous improvement enable us to build long-term partnerships that drive successful project outcomes.

We believe lasting Relationships are built on:

Trust & Transparency

We foster open communication, ethical business practices, and complete accountability in every engagement.

Reliability

Our clients rely on us for consistent, high-quality services delivered with professionalism, precision, and integrity.

Innovation

We embrace forward-thinking solutions and adapt to evolving industry requirements to help clients achieve greater efficiency and long-term success.

As industries continue to evolve, Korax Energy remains dedicated to helping clients overcome complex challenges, optimize project performance, and achieve sustainable growth through dependable and innovative solutions.

What Sets Us Apart

Independent and Objective Inspection Services

01

Commitment to International Quality Standards

02

Experienced and Highly Skilled Engineering Professionals

03

Transparent Communication and Dedicated Client Support

04

Tailored Solutions to Meet Project-Specific Requirements

05

Strong Commitment to Health, Safety, and Quality (HSEQ)

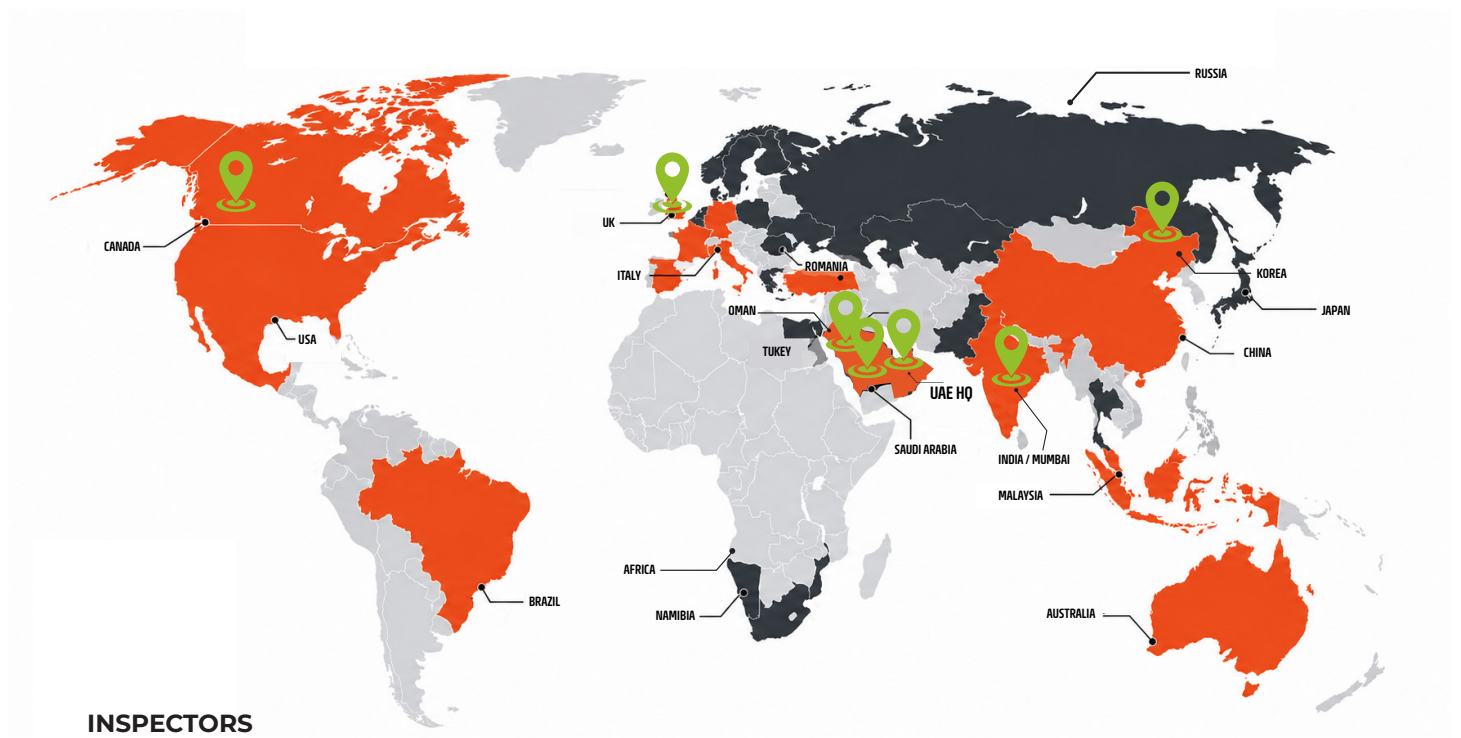

06

Long-Term Partnerships Built on Trust and Performance

07
